SYSTEM AND METHOD FOR BUSINESS PROCESS SPACE DEFINITION

Abstract of the Disclosure

5   A method and system for representing business processes such as in a workflow model. Each of a plurality of processes is defined as a 3-tuple including a noun, a verb and an attribute, and a selected process is displayed as a point in navigation space. In this manner, business

10   processes are classified and organized in terms of a 3-dimensional process navigation space facilitating process identification, decomposition and definition by traversal of this space.
